

2000b Series Frequency Options

audio-technica

The 2000b series is available in four different frequency bands:

U band - TV channel 38 - Up to 10 systems.

- A yearly 'shared' licence is required to use TV channel 38, it costs £75 and is available to purchase on <https://www.ofcom.org.uk/manage-your-licence/radiocommunication-licences/pmse>.
- The frequencies are set aside for professional users only, so there is a low risk of interference.

D/I band - Multiple TV channels - Up to 20 systems

- A yearly 'set-location' licence is required costing £28 per system and is available to purchase on <https://www.ofcom.org.uk/manage-your-licence/radiocommunication-licences/pmse>.
- You can check the availability in your location by calling Audio-Technica, visiting our [support web page](#) or going to <http://static.ofcom.org.uk/static/spectrum/map.html>.
- The frequencies are set aside for your personal use only, ensuring the best protection against interference.

F band - TV channel 70 - Up to 4 systems.

- No licence is required when using these systems.
- The F band frequencies are used by other domestic products like baby monitors and wireless speakers, so there is no protection against interference.
